Notes to the Condensed Interim Financial Statements

For the nine months ended December 31, 2013

1. Nature of Operations and Continuance of Operations

Sanatana Resources Inc. ("Sanatana" or the "Company") was incorporated as Sanatana Diamonds Inc. on June 25, 2004 under the British Columbia Business Corporations Act. The Company changed its name to Sanatana Resources Inc. on April 28, 2011. Sanatana is an exploration stage company, and its principal business activity is the acquisition, exploration and development of mineral properties. The Company holds interests in certain Ontario gold exploration claims.

The Company is in the process of exploring its mineral property interests and has not yet determined whether its mineral property interests contain mineral reserves that are economically recoverable. The Company has not generated revenue from operations. The Company incurred a loss of \$7,137,269 during the nine months ended December 31, 2013 and, as of that date the Company's deficit was \$42,411,379. As the Company is in the exploration stage, the recoverability of the costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties and deferred exploration expenditures. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern. The Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future. The Company had cash of \$477,578 at December 31, 2013 (March 31, 2013 - \$791,267).

The business of exploring for and mining of minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. Changes in future conditions could require material write-downs of the carrying values of the exploration and evaluation assets.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, unregistered claims, and non-compliance with regulatory requirements.

The head office and principal address of the Company are located at Suite 908 - 925 West Georgia Street, Vancouver, British Columbia, V6C 3L2.

2. Basis of Presentation

Statement of Compliance

These condensed interim financial statements of the Company for the nine months ending December 31, 2013 have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), on a basis consistent with the significant accounting policies disclosed in note 3 of the most recent annual financial statements as at and for the year ended March 31, 2013 as filed on SEDAR at www.sedar.com. The condensed interim financial statements do not include all of the information required for full annual financial statements and were approved and authorized for issue by the audit committee on February 20, 2014.

Sanatana Resources Inc.

Notes to the Condensed Interim Financial Statements

For the nine months ended December 31, 2013

2. Basis of Presentation (continued)

Basis of Measurement

The financial statements have been prepared on a historical cost basis.

The financial information is presented in Canadian dollars, which is the functional currency of the Company.

Critical accounting estimates and assumptions

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive loss/income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below:

Rehabilitation Provisions

Rehabilitation provisions have been created based on the Company's internal estimates with future period amounts discounted to reflect the time value of money. Assumptions, based on the current economic environment, have been made which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from period to period. Actual rehabilitation costs will ultimately depend on future market prices for the rehabilitation costs which will reflect the market condition at the time the rehabilitation costs are actually incurred. The final cost of the currently recognized rehabilitation provisions may be higher or lower than currently provided for.

Exploration and Evaluation Expenditures

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after the expenditure is capitalized, information becomes available suggesting that the recovery of the expenditure is unlikely, the amount capitalized is written off in the profit or loss in the period the new information becomes available.

Title to Mineral Property Interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

Sanatana Resources Inc.

Notes to the Condensed Interim Financial Statements

For the nine months ended December 31, 2013

2. Basis of Presentation (continued)

Income Taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of the tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties in the current tax provision. The Company believes it has adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent there are sufficient taxable temporary differences (deferred tax liabilities) relating to the same taxation authority and the same taxable entity against which the unused tax losses can be utilized. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

Share-based Payment Transactions

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 11.

3. Changes in Accounting Policies

New Accounting Pronouncements

IASB or the IFRIC have issued certain pronouncements that are mandatory for accounting years beginning on or after April 1, 2014. None of these are expected to be relevant to the Company's financial statements, except for the following:

IFRS 9 Financial Instruments

IFRS 9 Financial Instruments is part of the IASB's wider project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The standard is effective for annual periods beginning on or after January 1, 2015 but is not likely to have a material impact on the Company's financial statements.

There are no other IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Company.

In February 2011, the Company entered into an option and joint venture agreement with Augen Gold Corp., which was subsequently acquired by Trelawney Mining and Exploration Inc. ("Trelawney") and renamed Trelawney Augen Acquisition Corp. ("TAAC"). In turn, Trelawney Mining and Exploration Inc. was purchased by IAMGOLD Corporation. The option and joint venture agreement grants the Company an option to acquire up to a 51% undivided interest in the rights to 46 mineral concessions (the "Claims") and the first right of refusal to acquire an additional nine mineral concessions (the "ROFR Claims"), all located in Ontario and owned by TAAC.

The Company has earned a 50% undivided interest in the Claims (the "50% Interest") by paying \$150,000 in cash, issuing 5,000,000 common shares of which 1,500,000 were issued in prior fiscal year at a fair value of \$510,000, and incurring exploration expenditures of \$5,000,000. The Company has continued exploration of the Claims and incurred a further \$3,838,000 in exploration and related expenditures, including a permitted administrative mark-up that will be credited to the Company's contribution to the first work program after formation of a joint venture.

The Company has a right to earn a further 1% interest in the Claims for a total undivided interest of 51% by delivering a pre-feasibility study to TAAC on or before March 23, 2016. The parties will enter into a joint venture agreement for the Claims in accordance with the terms of the option and joint venture agreement on the earlier of the date that (i) Sanatana vests the 50% Interest but elects by notice to TAAC not to proceed to earn the 51% Interest; and (ii) Sanatana earns the 51% Interest.

The option and joint venture agreement includes a provision that while the Company and TAAC are parties to an option or joint venture with respect to the Claims or the ROFR Claims, TAAC has the option to purchase up to 10% of any securities issued in equity offerings by the Company.

The Company agreed to pay a finders' fee in connection with the Watershed property that was payable in the Company's common shares. The amount of the finders' fee was based on the transaction value, as defined in the finder's fee agreement. The maximum value of the finders' fee determined in accordance with applicable regulatory policies was \$142,500, which was settled through the issuance of 678,570 common shares. In fiscal 2012, the Company issued 239,283 common shares with a value for accounting purposes of \$50,250. In August 2012, the Company issued 439,287 common shares with a value for accounting purposes of \$109,822.

Rights Acquired

Trelawney, an affiliate of TAAC, previously acquired a 20% undivided interest in certain unpatented mining claims (the "AOI Mining Claims") situated in the Yeo and Chester townships that are within the area of interest under the Company's option and joint venture agreement with TAAC. Concurrently, TAAC took an assignment of Crown Gold Corporation's ("Crown Gold") rights under an amendment and assignment of mining claim acquisition agreement (the "Acquisition Agreement").

In July 2013, Sanatana elected to (1) have the interest in the AOI Mining Claims be included and form part of the Watershed Property for the benefit of Sanatana and TAAC and (2) acquire the rights under the Acquisition Agreement. The acquisition costs for the interest in the AOI Mining Claims and the assignment of the Acquisition Agreement totalled \$143,317 and the Company has reimbursed TAAC for this amount.

Under the terms of the underlying Acquisition Agreement, the AOI Mining Claims are subject to the following terms:

- The 20% undivided legal and beneficial interest in the AOI Mining Claims is identified as a "carried interest" under the Acquisition Agreement and is defined to mean that, until completion of a positive pre-feasibility study, all costs and expenses of the exploration programs, preparation and filing of assessment reports and other obligations relating to the Mining Claims are the sole obligation of Trelawney and Sanatana will not have any obligation in that regard.
- Upon completion and delivery of a positive pre-feasibly study to Sanatana and TAAC, Trelawney, TAAC and Sanatana will enter into a joint venture agreement for the further exploration and development of the AOI Mining Claims on terms to be negotiated in good faith between the parties.
- If Sanatana's and TAAC's interest in the AOI Mining Claims is diluted to an amount less than 10% then such interest which is less than 10% will be converted into a 2% net smelter returns royalty.
- So long as Sanatana and TAAC have any interest in the AOI Mining Claims, Trelawney is required to deliver to Sanatana no less than quarter-yearly, complete copies of all reports, files, maps, core, samples, data and other information regarding the AOI Mining Claims.
- The AOI Mining Claims are subject to 2% net smelter return royalty, which can be reduced to 1% by paying the royalty holders \$1,000,000 at any time.

Cryderman Property

In the quarter ended June 30, 2013, the Company staked a mining claim, the "Cryderman Property", that is within the area of interest under the option and joint venture agreement with TAAC. In accordance with the option and joint venture agreement, the Company elected to keep the claim for its own benefit and so it did not form a part of the Watershed Property. In October 2013, the Company lost its rights to the Cryderman property and so the Company wrote off accumulated costs of \$4,536.

Authorized share capital comprises an unlimited number of common shares with no par value.

Common Shares

Fiscal 2014

In December 2013, the Company closed a non-brokered private placement of 5,500,000 flow-through units at a price of \$0.05 per unit for gross proceeds of \$275,000. Each flow-through unit consists of one flow-through common share and one-half of one share purchase warrant. Each whole warrant will entitle the holder to purchase one additional non-flow-through common share at a price of \$0.10 until December 20, 2015. The Company paid an aggregate cash commission of \$22,000 representing 8% of the gross proceeds from the sale of units to purchasers. All securities issued under the offering are subject to a statutory hold period ending on April 21, 2014.

On closing the December 2013 flow-through financing, the Company recognized a \$68,800 liability representing its obligation to renounce flow-through expenditures to investors.

In October 2013, the Company closed a non-brokered private placement of units for gross proceeds of \$50,000 representing 625,000 units at a price of \$0.08 per unit. Each unit consists of one common share and one warrant to purchase a common share at a price of \$0.12 until October 16, 2015. All securities issued under the offering are subject to a statutory hold period ending on February 17, 2014.

In August 2013, the Company closed a non-brokered private placement of units for gross proceeds of \$803,000, representing 10,037,500 units at a price of \$0.08 per unit. Each unit consists of one common share and one warrant to purchase a common share at a price of \$0.12 until August 14, 2015. In connection with the offering, the Company paid a cash commission of \$19,800, being 6% of the aggregate proceeds from the sale of units to purchasers introduced by a finder. The Company also issued warrants with the same terms as the financing warrants to acquire up to 330,000 shares, being 8% of the number of units sold under the offering to purchasers introduced by a finder. All securities issued under the Offering are subject to a statutory hold period ending on December 15, 2013. The finder's warrants have a fair value of \$6,930, which was determined using the Black-Scholes option pricing model with the following assumptions:

Risk-free interest rate	1.22%
Estimated volatility	82%
Expected life	2 years

Fiscal 2013

In November 2012, the Company closed a non-brokered private placement consisting of 6,013,500 flow-through units priced at \$0.33 per unit for gross proceeds of \$1,984,455. Each unit consisted of one flow-through common share and one-half of one share purchase warrant where each whole warrant will entitle the holder to purchase one additional non-flow-through common share of the Company at a price of \$0.40 per warrant share until November 9, 2014. The Company paid a finder's fee of \$103,158.

The Company renounced the full \$1,984,455 to investors in February 2013, and has incurred sufficient exploration expenditures to satisfy its flow-through expenditure obligation.

10. Share Capital and Reserves (continued)

In July 2012, the Company closed a non-brokered private placement of 5,315,000 non-flow-through units priced at \$0.25 per unit and 2,853,333 flow-through units priced at \$0.30 per unit for aggregate gross proceeds of \$2,184,750. The non-flow-through units consisted of one common share and a half-warrant, with each full warrant exercisable at \$0.35 until July 12, 2013. The flow-through units consisted of one flow-through common share and a half-warrant, with each whole warrant exercisable into non-flow-through common shares at \$0.40 per share until July 12, 2013. The Company paid cash commissions of \$116,148 to certain finders (equal to 7% of proceeds raised by such finders) and issued 429,800 finder warrants to certain finders. The finders' warrants have a fair value of \$36,100, which was determined using the Black-Scholes option pricing model with the following assumptions:

Risk-free interest rate	1.0%
Estimated volatility	101%
Expected life	1 year

Each finder's warrant had the same terms as the non-flow-through warrants in the offering. The Company renounced an amount equal to the gross proceeds derived from the sale of the flow-through units to purchasers in accordance with the provisions of the Income Tax Act (Canada).

On closing the July 2012 flow-through financing, the Company recognized a \$142,667 liability representing its obligation to renounce flow-through expenditures to investors. The Company incurred sufficient exploration expenditures to satisfy this obligation by September 30, 2012 and renounced the full \$856,000 to investors in February 2013.

11. Share-Based Payments

The Company has a rolling stock option plan that allows the Company's board of directors to issue options to purchase up to 10% of the common shares outstanding at the grant date. Directors, officers, consultants and employees of the Company are eligible to receive stock options, subject to the policies of the Exchange. The directors may set option terms, but options granted under the plan typically have a life of five years and vest over an 18-month period. Share-based payments expense is amortized over the vesting period. The Company's shareholders reconfirmed the option plan in December 2013.

In June 2012, the Company issued 3,350,000 options exercisable at \$0.35 per share and then cancelled options to purchase 1,400,000 common shares, of which 600,000 options were exercisable at \$0.75 per share and 800,000 options were exercisable at \$1.35 per share.

In September 2012 the Company issued options to purchase 500,000 common shares at \$0.40 for a period of one year to an investor relations provider and options to purchase 100,000 common shares at \$0.40 per share for a period of five years to a consultant.

13. Loss per Share

The calculation of the basic and diluted loss per share for the periods presented is based on the following data:

	Three months ended December 31,		Nine months ended December 31,	
	2013	2012	2013	2012
	\$	\$	\$	\$
Loss for the period	(6,365,516)	(226,130)	(7,137,269)	(1,050,661)
Weighted average number of common shares outstanding	116,022,486	101,446,508	110,277,300	95,392,947
	(0.05)	(0.00)	(0.06)	(0.01)

Diluted loss per share for the three and nine months ended December 31, 2013 and 2012 is the same as basic loss per share as the impact of the exercise of the share options and warrants is anti-dilutive.
